SUMMARY

Business Analytics & Data Science student at the University of Sydney, graduating in 2027, with hands-on experience turning data into clear, useful insights. Comfortable using Excel and Python to collect, clean and analyse data, and Microsoft Office Specialist (Excel) certified. A diligent, detail-oriented team player looking to apply analytical and problem-solving skills in a professional setting.

EDUCATION

Bachelor of Commerce, Business Analytics & Data Science

2025 – 2027 (expected)

The University of Sydney Business School

Sydney, NSW

WAM: 76.1 / 100

Awards: Sydney International Student Award (merit-based)

Relevant coursework: Data Science (DATA1002, DATA2001), Business Analytics, Statistics

EXPERIENCE

Sales & Operations Assistant — Aurum Perfume, Hanoi, Vietnam

Dec 2024 – Present

- Recorded and maintained daily sales and cash-flow data in Excel (PivotTables, Power Query), keeping records accurate and up to date.
- Built simple Excel reports and charts to track sales trends and make figures easier for the team to read.
- Collected and cleaned customer feedback and sales data, with careful attention to detail in data entry.
- Worked with teammates on supplier and stock tracking, supporting day-to-day reporting tasks.

DATA & ANALYTICS PROJECTS

Credit Card Customer Segmentation (Personal project)

Sep – Dec 2024

- Analysed 8,950 cardholders in Python (Pandas, scikit-learn), using K-Means and PCA to surface three distinct customer segments (high-value, at-risk and low-engagement).
- Translated the segments into three practical retention strategies and presented the findings to mentors.

Student Wellbeing & Success Analysis (University project)

2025

- Cleaned and analysed survey data across three datasets (Python), finding study time the strongest driver of exam performance ($r = 0.83$).
- Built and compared three classification models and summarised the results in a written report.

NSW–Parramatta Data Atlas (DATA2001)

2025

- Cleaned ABS demographic data and 2,086 location data points (via API) to score resource access across 34 regions.
- Presented spatial and demographic patterns in an interactive browser dashboard with maps and charts.

SKILLS

Tools: Excel (Power Query, PivotTables, VBA) — MOS certified; Python (Pandas, scikit-learn); SQL; Power BI; Word & PowerPoint (MOS certified).

Data: Data collection & cleaning, analysis & visualisation, dashboards, pattern recognition.

Strengths: Attention to detail, problem-solving, teamwork, clear communication, self-starter.

Languages: English (fluent), Vietnamese (native).
